Circular Economy Bill

Route Map

Route Map sets out how delivery of a system-wide, comprehensive vision for Scotland's Circular Economy

- Builds on achievements made to date and actions already underway, with a focus on existing waste and recycling targets and looking beyond existing deadlines
- Outlines the tangible actions that must be taken to accelerate progress
- Identifies tools to be put in place to enable everyone to play their part
- Specifies legislative requirements that gives the powers to act

What are the opportunities?

- Greater **collaboration** and **partnership** working
 - Goes beyond traditional/conventional sector partnerships...**new conversations and alignment** of agendas and priorities
- Collectively thinking '**beyond the bin**'
 - Looking past essential services to **what's next** and what can be achieved...
 - Not just 'waste', prioritising **whole life cycle value chain** thinking
- **Financial benefits** to be realised through **greater focus** on resource consumption and optimising resource use
- Innovating, expanding niche practices, normalising good practice, **recognising synergies across sectors**, optimising support...
